EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sean Detweiler on August 16, 2005.

The application has been amended as follows:

In claim 1, line 3, "wavelength in at least one of the visible and infrared" has been deleted and -- wavelength in the visible and infrared-- has been inserted.

In claim 1, line 7, "control of the at least one radiation" has been deleted and -- control of the radiation -- has been inserted.

In claim 8, line 5, "wavelength for a period" has been deleted and -- wavelength in the visible and infrared wavelength for a period -- has been inserted.

Reasons For Allowance

The prior art of record does not disclose or fairly suggest an apparatus and method for treating a patient comprising a massaging mechanism and a radiation producing device that produces radiation in the visible and infrared spectrums and is controlled by a processor for controlling the radiation wavelengths. U.S. Patent 5,330,416 discloses a massaging system with infrared tubes as heating elements with simple on/off switch control. U.S. Patent 6,039,702 teaches a massing system with electric heat pads that is microprocessor controlled. Neither disclose visible and infrared radiation controlled by a processor.
